

Privacy Policy

Last updated: January 1, 2026

1. Introduction Welcome to Pulsync. We help you capture and manage your health measurements with a strong focus on privacy and on-device processing. This Privacy Policy explains what information the app handles, how it's used, and the choices you have. By using Pulsync, you agree to this policy.

Pulsync is designed to keep your data on your device. We do not run a backend that stores your health data, and we do not sell your information.

1. What Data We Handle Pulsync operates primarily on-device. The app may handle the following categories of information:

- Health measurements you provide • What: Blood Pressure (systolic/diastolic), Blood Sugar, Heart Rate, Temperature, Weight, Oxygen Saturation, and Steps. • Where it's stored: Locally on your device using Apple's secure storage technologies. • How it's created: Entered manually or captured via the camera and processed on-device.

- Camera images for capture (on-device processing) • What: Photos you take within the app to extract numbers from device screens (e.g., a blood pressure monitor). • Where it's stored: Processed on-device for text recognition; Pulsync does not automatically save these images to your photo library or upload them to a server.

- Apple Health (HealthKit) integration (write-only) • What: With your explicit permission, Pulsync can WRITE your measurements to Apple Health (e.g., blood pressure, blood glucose, heart rate, temperature, weight, oxygen saturation, steps). • What we do NOT do: Pulsync does not READ your data from Apple Health. • Control: You can change these permissions at any time in the Apple Health settings.

- Device and usage information • What: Pulsync does not collect device identifiers or analytics for transmission to a server. We use privacy-preserving, on-device logging to help with troubleshooting and to improve reliability. • Optional sharing: If you contact support and choose to share logs or screenshots, you decide what to send.

We do not collect your name, email, or address in the app. If you contact us via our website or email, we will receive the information you choose to provide so we can respond.

1. How We Use Your Data We use your data solely to provide the app's core functionality: • Capture measurements via camera or manual entry • Store and display your history of measurements on your device • Optionally write your measurements to Apple Health (with your permission) • Let you export your data as a CSV file via the iOS share sheet • Maintain app reliability and security using on-device logs

We do not use your data for advertising or profiling.

1. Data Sharing and Third Parties • No selling or ad-based sharing: We do not sell your personal data and we do not share it with advertisers. • No third-party analytics SDKs: Pulsync does not include third-party analytics frameworks that collect your data. • Apple Health: If you enable Health integration, your measurements are written to the Apple Health app on your device. Apple manages Health data according to its own policies. You control these permissions in the Health app. • Exports and sharing you initiate: If you export a CSV or share content via the iOS share sheet (e.g., Mail, Files, iCloud Drive, or other apps), the handling of that data is governed by the destination's privacy policy, not Pulsync's. • Support interactions: If you contact us and choose to share diagnostic information, that content is used only to address your request.
2. Your Choices and Controls • Health permissions: Enable/disable Apple Health writing at any time. Revoke or adjust permissions in the Health app. • Camera permission: Grant or revoke camera access in iOS Settings > Pulsync. • Auto Sync: Choose whether new measurements are written to Apple Health automatically or only when you manually sync. • Export: Export your measurements as a CSV file from Settings and choose where to save or share it. • Deletion: • Delete individual measurements from the History tab. • Clear all measurements in Settings ("Clear all app data"). • Remove data from Apple Health in the Health app. • Correction: If a measurement is incorrect, delete it and re-enter the correct values.

Because Pulsync stores data locally on your device and does not maintain a user account or cloud service, many "access" or "deletion" requests under laws like GDPR/CCPA are best exercised directly within the app and your device settings.

1. **Data Retention** • **On-device:** Measurements remain on your device until you delete them (individually or via “Clear all app data”). • **Apple Health:** If you write data to Apple Health, it remains there until you remove it in the Health app. If you uninstall Pulsync, you will be given an opportunity to remove any data in Apple Health inputted by Pulsync • **Support:** If you email us, we retain your message and any attachments only as long as necessary to resolve your issue, unless a longer period is required by law.
2. **Security** • **On-device protections:** Pulsync relies on iOS and Apple frameworks (e.g., HealthKit, on-device storage, sandboxing, and device encryption) to protect your data. • **No routine transmissions:** Pulsync does not routinely transmit your measurements to a server. Network activity typically occurs only when you choose to export/share data or open external links (e.g., to Settings or support pages). • **Best practices:** Keep your device updated and secured (e.g., passcode, Face ID/Touch ID) to help protect your data.
3. **Children’s Privacy** Pulsync is not intended for children under the age of 13. We do not knowingly collect personal information from children. If you believe a child has provided us with personal information, please contact us so we can address it.
4. **International Data Transfers** Pulsync does not operate a backend that stores your measurements; your data remains on your device. If you choose to export or share data to a third-party service, that service’s location and policies apply.
5. **Changes to This Policy** We may update this Privacy Policy to reflect app changes or legal requirements. When we do, we will update the “Last updated” date above. Continued use of the app indicates your acceptance of the updated policy.
6. **Contact Us** If you have questions about this Privacy Policy or need assistance, please reach out via the email on the support page on our website. We will respond as soon as possible.
